ABOUT

DefHacks is a certified 501 (c) (3) non-profit hackathon made by and for students. This year, we will be hosting our 4th annual hackathon in Seattle. Due to the ongoing COVID-19 situation, we will be hosting the hackathon virtually and opening it up to international participants. In previous events, over 150 hackers have competed in the annual hackathon, showing off their coding prowess over the course of 24-36 hours. The projects created at DefHacks represent the innovations and skills of the up and coming generation of computer scientists. This is not something you should miss out on!

SPONSOR BENEFITS

DefHacks is the perfect opportunity for companies to interact with the next generation of software developers. DefHacks sponsors will foster relationships with hundreds of highly motivated members in the hacking community. This innovative event is an excellent place to evaluate the design, development, and collaboration skills of qualified internship and job candidates. In addition, sponsors can promote their company by demonstrating their APIs and products, holding workshops guiding students in the use of their technologies, giving technical talks, and by distributing swag.

Additionally, here are some other perks of being a sponsor:

- Providing prompts that will facilitate the development of innovative solutions to your problem
- Access numerous resumes, email addresses, and LinkedIn profiles
- Showcase your workplace culture by sponsoring swag, games, and/or shipping snack boxes to hackers
- Recognized on the DefHacks website and the opening and closing ceremonies
- And most importantly, support the future generation of developers!

We strive to connect mission-driven organizations like yours with ambitious hackers to foster creativity and innovations. We cannot wait for you to be a part of the 2020 DefHacks Virtual Hackathon!

Thank you so much!
The 2020 DefHacks Team
